## FREEDOM ADVANCED BOTTOM TIMER

### DS-8102

฿39,382

#### Features:

- full color TFT display
- three screens during the dive including the graphical dive profile
- reversible display for left/right hand
- brightness adjustment
- durable aluminum body
- 300 m (1 000 ft) operational depth
- metric/imperial units
- depth average with the possibility to restart
- stopwatch
- easy-to-use two button control
- rechargeable Li-Ion battery
- high-precision depth sensor
- vibrating alarms strong enough for a drysuit
- decompression games
- textile strap or bungee wrist mount
- log processing in the cloud or offline
- software version upgradeable
- free firmware updates
- USB connection and charging

#### Freedom Advanced Bottom Timer package includes:

#8102 Freedom Advanced Bottom Timer

#8075 USB charger

#1481 Attachment bungee

#1482 fastening strap or #1483 fastening strap for dry suit

#3151 silicon protective sleeve

# DIVESOFT

## FREEDOM CCR BOTTOM TIMER WITH OUT CABLE

**DS-8273**    **฿57,356**

**Features:**

- full color TFT display
- four screens during the dive including the graphical dive profile and sensor screen
- reversible display for left/right hand
- brightness adjustment
- durable aluminum body
- 300 m (1000 ft) operational depth
- metric/imperial units
- depth average with the possibility to restart
- stopwatch
- easy-to-use two button control
- rechargeable Li-Ion battery
- high-precision depth sensor
- vibrating alarms strong enough for a drysuit
- decompression games
- textile strap or bungee wrist mount
- log processing in the cloud or offline
- connection to one, two or three oxygen cells
- software version upgradeable
- free firmware updates
- USB connection and charging

**Freedom CCR Bottom Timer package includes:**

**#8273 Freedom Advanced Bottom Timer**

**#8075 USB charger**

**#1481 Attachment bungee**

**#1482 fastening strap or #1483 fastening strap for dry suit**

**#3151 silicon protective sleeve**

Dive Computer

## FREEDOM FULL TRIMIX

### DS-8058

฿56,612

#### Features:

- up to 9 mixtures with any content of Oxygen and Helium
- Bühlmann's ZHL decompression algorithm
- fully adjustable gradient factors
- deco stops or deco ceiling for continual decompression
- full color TFT display
- four screens during the dive including the graphical dive profile
- reversible display for left/right hand
- brightness adjustment
- durable aluminum body 3
- 00 m (1000 ft) operational depth
- metric/imperial units
- depth average with the possibility to restart
- easy-to-use two button control
- rechargeable Li-Ion battery
- high-precision depth sensor
- vibrating alarms strong enough for a drysuit
- decompression games
- textile strap or bungee wrist mount
- log processing in the cloud or offline
- software version upgradeable
- free firmware updates
- USB connection and charging
- Freedom displays are protected by protector display overlay.
- You can choose from two variants of the fastening strap (35,5 cm or 42,5 cm).

#### Freedom Full Trimix contents:

#8058 Freedom Full Trimix computer

#8075 USB charger

#1481 Attachment bungee

#1482 fastening strap or #1483 fastening strap for dry suit

#3151 silicon protective sleeve

# DIVESOFT

## FREEDOM ADVANCE NITROX

### DS-8057

฿48,407

#### Features:

- up to 3 mixtures with any fraction of Oxygen
- Bühlmann's ZHL decompression algorithm
- fully adjustable gradient factors
- deco stops or deco ceiling for continual decompression
- full color TFT display
- four screens during the dive including the graphical dive profile
- reversible display for left/right hand
- brightness adjustment
- durable aluminum body
- 300 m (1000 ft) operational depth
- metric/imperial units
- depth average with the possibility to restart
- easy-to-use two button control
- rechargeable Li-Ion battery
- high-precision depth sensor
- vibrating alarms strong enough for a drysuit
- decompression games
- textile strap or bungee wrist mount
- log processing in the cloud or offline
- software version upgradeable
- free firmware updates
- USB connection and charging
- Freedom displays are protected by protector display overlay.

You can choose from two variants of the fastening strap (35,5 cm or 42,5 cm).

#### Freedom Advanced Nitrox contents:

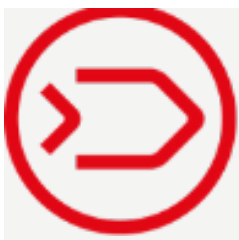

#8057 Freedom Advanced Nitrox computer

#8075 USB charger

#1481 Attachment bungee

#1482 fastening strap or #1483 fastening strap for dry suit

#3151 silicon protective sleeve

# DIVESOFT

Dive Computer

## Freedom Basic Nitrox

### DS-8056

฿43,485

- Features:
- 1 mixture – Air or nitrox with up to 40% of Oxygen
- Bühlmann's ZHL decompression algorithm
- fully adjustable gradient factors
- deco stops or deco ceiling for continual decompression
- full color TFT display
- four screens during the dive including the graphical dive profile
- reversible display for left/right hand
- brightness adjustment
- durable aluminum body
- 300 m (1 000 ft) operational depth
- metric/imperial units
- depth average with the possibility to restart
- easy-to-use two button control
- rechargeable Li-Ion battery
- high-precision depth sensor
- vibrating alarms strong enough for a drysuit
- decompression games
- textile strap or bungee wrist mount
- log processing in the cloud or offline
- software version upgradeable
- free firmware updates
- USB connection and charging
- Freedom displays are protected by protector display overlay.
- You can choose from two variants of the fastening strap (35,5 cm or 42,5 cm).

**Freedom Basic Nitrox contents:**

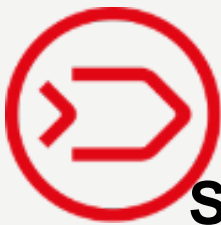

**#8056 Freedom Basic Nitrox computer**

**#8075 USB charger**

**#1481 Attachment bungee**

**#1482 fastening strap or #1483 fastening strap for dry suit**

**#3151 silicon protective sleeve**

## SET BLENDER BASIC

฿81,816

### DS-8315

Professional Set Blender Basic was compiled for divers and mainly for filling stations, which prepare Nitrox and Trimix and which want to have analyzer stored in the watertight Divesoft transport case.

Set Blender Basic includes:

- #8312 Analyzer He/O<sub>2</sub>
- #8015 Watertight case
- #8021 Professional flow limiter
- #8009 Connecting hose
- #3026 Power adapter
- #8019 Spare parts

The analyzer is supplied with rechargeable Li-Ion battery.

## SET BLENDER MAX

### DS-8316

฿84,922

Professional Set Blender Max was compiled for divers and filling stations, which prepare Nitrox and Trimix gas mixtures. The analyzer can measure resistance and voltage and can be stored in the supplied waterproof Divesoft transport case. Set Blender Max contains professional flow limiter.

Set Blender Max includes:

- #8312 Analyzer He/O<sub>2</sub>
- #8015 Watertight case
- #8021 Professional flow limiter
- #8009 Connecting hose
- #8018 Ohmmeter
- #8017 Voltmeter
- #8014 Measuring cables
- #3026 Power adapter
- #8019 Spare parts

The analyzer is supplied with rechargeable Li-Ion battery.

# DIVESOFT

## ANALYZER HE/O2

### DS-8313

฿69,571

Analyzer He/O2 is a precise apparatus for measuring oxygen helium concentrations in diving breathing gasses. It is a necessary tool for technical divers using nitrox and trimix mixtures.

Stand Alone Analyzer includes:

#8312 Analyzer He/O2

#8012 Simple flow limiter

#3026 Adapter with endings for the whole world

#3433 EVA case for Analyzer He/O2

## ANALYZER SOLO

### DS-8300

฿55,439

Analyzer SOLO is a precise apparatus for measuring oxygen and helium concentrations in scuba diving breathing gasses. It is a necessary tool for technical divers using nitrox and trimix mixtures.

Analyzer SOLO comes with following:

#8300 Analyzer SOLO

#3362 USB-C cable

#8306 Simple flow limiter

#3367 Semi-hard zipper case for Analyzer Solo
