- The battery is charged through the smart magnetic contacts found at the rear of the torch. This is an incredibly easy and fast solution of charging.
- Emergency mode doesn't allow the diver to stay in the darkness during the dive. Just before the BANG is close to discharge, it will switch to blinking mode and provides enough time to finish the dive.
- BANG is equipped with the easy adjustable soft handle "one size fits all".
- Small size and low weight of the torch is the great benefit for traveling.
