The Sharkskin T2 Chillproof range is a step up from the standard Chillproof range in that it provides even more warmth by using Titanium Far Infrared (FIR) nano-technology to retain your body's heat as well as improving circulation and metabolic function.

The T2 Chillproof range is the same thickness as standard Chillproof, is 100% windchill proof, lightweight, neutrally buoyant and provides the warmth of a 4-5mm wetsuit allowing you to replace your wetsuit with T2 in warmer waters or layer-up underneath a wetsuit with T2 for extra insulation and warmth for colder waters.
